# Study Probems

## Rules and Instructions

- Try to solve them as independently as possible
- Use your own notes to find the necessary information
- Look for more information in the provided book chapters if necessary
- Hand in at least 10 solved / fully attempted problems before the exam (I recommend to solve all)
- They all need to be hand-written on paper
- At least 3 problems from each level
- Write your name on each sheet and put all the sheets inside the study problem sheet
- On the back of the study problem sheet list the problems you have solved to simplify my checking
- If there are at least 10 fully solved / attempted problems, a grade bonus of 0.2 will be given in the exam
- If you understand them, then you are prepared for the exam
